

I Cotti fatti a mano

I Cotti fatti a mano

Veri e propri manufatti in terracotta, in cui l'artigianalità e l'autenticità della materia ceramica esprimono tutta la loro forza seducente. Un importante supporto in terra rossa di quasi 2 cm di spessore, accoglie smalti trasparenti e lucenti ottenuti con l'antichissima tecnica ceramica dell'ingobbio e cristalline; ogni pezzo è unico così da creare superfici di rara bellezza ceramica.

I piccoli formati, in particolare il triangolo e il rombo, contribuiscono a rendere ancora più esclusiva questa collezione. Con i suoi colori radiosi e scintillanti e le 2 tipologie di finitura -*cerato e smaltato*- questa collezione evoca il Sud e i contrasti delle isole dove la lucentezza specchiante dell'acqua si scontra con la solida e confortevole opacità della terra.

[en] Real hand-made tiles in terracotta, whose craftsmanship and authenticity express all their seductive power. These 2 cm thick red earth supports are precious backdrops for the ancient technique of engobe and transparent shiny glaze; each piece is unique so as to create surfaces of rare ceramic beauty. The small formats, in particular the triangle and the rhombus, contribute to making this collection even more exclusive.

With their radiant and brilliant colors, and the two varieties of waxed and glazed surfaces, this collection evokes the Mediterranean and the contrasts of the islands where the mirroring reflections of the water clash with the solid and comforting opacity of the earth.

A casa di Delphina O.

Isola di Eubea, Grecia

Storica dell'arte antica, Delphina O. divide la residenza fra Salonicco, dove insegna all'università, e l'isola di Eubea.

È in questa casa che Delphina trascorre buona parte dell'anno immersa nei suoi studi e circondata da libri e reperti dell'età ellenistica.

Ha scelto per la sua casa *I Cotti fatti a mano* che ricordano, nella brillantezza della superficie, l'antica tecnica del lustro.
