IL NOSTRO PERCORSO

Our Path

Ascot Ceramiche viene fondata nel 1973 nel distretto ceramico di Sassuolo e da allora è uno dei brand protagonisti della ceramica italiana.

Fin dagli inizi Ascot si è specializzata nella ricerca sulle materie naturali, argille e minerali, che per mezzo di processi tecnologici, diventano superfici da rivestimento e pavimento di ottima qualità, fattura e resistenza.

Numerose sono le collaborazioni attuate con architetti e designers nel corso degli ultimi 20 anni, ne citiamo alcune che hanno contribuito a rendere grande il Brand: Roberta Luppi, Claudio La Viola, Boris Tellegen e la Keith Haring Foundation.

Oggi il Brand Ascot cambia pelle e vive un periodo di profonda trasformazione. Acquisito dalla multinazionale Victoria PLC, produttrice e distributrice internazionale di

prodotti innovativi per pavimenti, tende a cogliere in modo sempre più efficace e veloce ogni esigenza del mercato rispondendo con servizi e prodotti idonei ad affrontare la sfida che il futuro ci impone.

Il futuro inizia ora, un nuovo cammino insieme

Ascot Ceramiche was established in 1973 in the ceramic district of Sassuolo and since then has been one of the leading brands in the Italian ceramic industry.

excellent quality, craftsmanship, and resistance.

Ascot has carried out numerous collaborations with architects and designers over the last 20 years, including Roberta Luppi, Claudio La Viola, Boris Tellegen and the Keith Haring Foundation, just to name a few that contributed to the brand's great success.

manufacturer and international distributor of innovative flooring products, Ascot aims to capture every market need even more effectively and rapidly, responding with services and products that meet the challenges that the future has in store for us.

From the very beginning, Ascot specialised in research into natural materials, clays and minerals, which by means of technological processes become wall and floor surfaces of

Today, the Ascot brand is changing its look and undergoing a period of deep transformation. Acquired by the multinational Victoria PLC,

The future starts now, a new path to travel together.

BRAND EQUITY

La Brand Equity rappresenta l'insieme dei valori che distinguono e differenziano un Brand. Essa racchiude il patrimonio e la natura del nuovo Brand Ascot.
Il nuovo logotipo distilla nei suoi caratteri stilistici, alcuni dei più importanti valori rappresentando il cambiamento che il Brand ha messo in atto, un percorso che è appena iniziato e che segna una nuova fase

per affrontare nuove sfide e nuovi mercati. Il processo di trasformazione porrà la sua attenzione su una maggiore efficienza, sempre più finalizzata alla soddisfazione della nostra clientela e mettendo in atto una ricerca stilistica che possa dar plasmare e dar vita a prodotti tecnicamente eccellenti, durevoli nel tempo ed esteticamente variegati.

STORICA
E SOLIDA
FLESSIBILE
RESPONSABILE
ATTENTA AL CLIENTE
ETICA E CORRETTA
TRASPARENTE

Brand equity represents the set of values that distinguish and differentiate a brand. It encapsulates the heritage and nature of the new Ascot brand.
In its stylistic features, the new logo distils some of the most important values representing the

change that the brand has implemented, a path that has just begun and that marks a new phase for confronting new challenges and new markets.
The focus of the process of transformation will

be on greater efficiency, increasingly aimed at satisfying our customers and conducting stylistic research that gives shape and life to products that are technically excellent, durable over time, and aesthetically varied.

PAY-OFF

03
PAY-OFF

01

Il **pittogramma** del cavallo viene mantenuto per continuità col passato, è rivisitato e sintetizzato secondo caratteri stilistici più moderni.

02

È stato scelto un **font** bastoni, senza fronzoli dal carattere solido per rappresentare la solidità di un'azienda rinnovata ma con 50 anni di esperienza.

03

"**Everytile**" rappresenta l'anima generalista del nuovo Brand Ascot, che si adatta alle esigenze della clientela e che amplia la propria gamma di prodotti per incontrare gusti e culture diverse.

01

The horse pictogram has been maintained for continuity with the past, but is revisited and synthesized in line with more modern stylistic features.

02

A sans serif font with no frills and a solid character was chosen to represent the solidity of a company that has been renewed but is backed up by 50 years of experience.

03

"**Everytile**" represents the overall spirit of the new Ascot brand, which adapts to the needs of customers and expands its product range to respond to different tastes and cultures.

AM BIE NT E

L'attenzione per ridurre al minimo l'impatto ambientale e l'utilizzo di materie prime selezionate, rendono i prodotti di ASCOT impiegabili negli ambienti più attenti alle esigenze normative ecologiche, lavorando così per il miglioramento continuo nell'ambito della ricerca e sostenibilità ambientale. ASCOT contribuisce con le proprie capacità tecnologiche e competenze professionali, al benessere e al miglioramento della qualità della vita delle comunità in cui opera.

The attention to minimize the environmental impact with the use of selected raw materials, make the ASCOT products usable in environments more attentive to ecological regulatory requirements, thus working for continuous improvement in research and environmental sustainability. ASCOT contribute s with its technological expertise and professional skills to the welfare and improvement of life quality of the community in which it works.

Sustainability

EVERYTILE
YOU'RE GREEN

RIDUZIONE DEL CONSUMO ENERGETICO

Il consumo energetico totale medio di energia (termica ed elettrica) espresso in GJ/t di prodotto smaltato versato a magazzino è diminuito rispetto a quanto registrato negli anni precedenti, attestandosi ampiamente entro valori richiesti. I consumi energetici vengono costantemente mantenuti sotto controllo e monitorati da parte del gestore.

RIDUZIONE DELLE EMISSIONI ATMOSFERICHE

L'uso attento, i costanti controlli e la continua evoluzione degli impianti produttivi, hanno contribuito a ridurre in modo continuo le emissioni gassose in atmosfera e ad abbattere in modo drastico le sostanze organiche volatili (VOC).

REDUCTION OF ENERGY CONSUMPTION

The total average consumption of energy (thermal and electrical) expressed in GJ / t of enamelled product paid to the warehouse is decreased compared to what was recorded in previous years, largely reaching the required values. Energy consumptions are constantly monitored by the operator.

REDUCTION OF ATMOSPHERIC EMISSIONS

The careful use, the constant controls and the continuous evolution of the production plants, have contributed to continuously reduce the gaseous emissions into the atmosphere and to drastically reduce the volatile organic substances (VOC).

RIDUZIONE DEL CONSUMO IDRICO

Il consumo idrico specifico degli impianti è in continuo miglioramento. Le acque di processo, vengono depurate e riutilizzate nell'impianto di lavaggio interno; la parte non utilizzata per l'uso interno, viene conferita al produttore e fornitore di impasto, che la utilizza per l'impianto di macinazione ad umido delle terre all'interno del proprio stabilimento, azzerando di fatto ogni tipo di scarico industriale.

RIUTILIZZO DEGLI SCARTI CRUDI E COTTI

Gli impianti così strutturati, permettono un completo riutilizzo degli scarti cotti e crudi. Gli scarti crudi vengono raccolti e conferiti al produttore d'impasto, che li riutilizza per la produzione dell'impasto usato. Gli scarti cotti vengono invece conferiti a ditte specializzate nella produzione di materiali inerti utilizzati come sottofondi di strade ed edifici, o a ditte produttrici di ceramiche che permettono il riutilizzo di tali materiali.

100% IMBALLAGGIO RICICLABILE

Tutti i materiali impiegati per gli imballaggi dei prodotti sono completamente riciclabili.

REDUCTION OF WATER CONSUMPTION

The specific water consumption of the plants is continuously improving. Process water is purified and reused in the internal washing plant; the surplus is given to the producer and supplier of the mixture, which uses it for the wet grinding system of the raw materials inside its own factory, effectively eliminating any type of industrial waste.

REUSE OF RAW AND FIRED WASTE

The plants thus structured allow a complete reuse of fired and raw waste. The raw waste materials are collected and given to the mixture producer, who reuses them for the production of the mixture. The fired waste are instead given to companies specialized in the production of inert materials used as base of roads and buildings, or to ceramics that allow the reuse of these materials.

100% RECYCLABLE PACKAGING

All the materials used for the packaging of the products are completely recyclable.

Nature amazes us by enriching
the stone with details. The strength
of the colour, the beauty of the
details.

Die Natur erstaunt uns, indem
sie den Stein mit Details
bereichert. Die Kraft der Farbe,
die Schönheit der Einzelheiten.

La nature nous émerveille
en enrichissant la pierre de
détails. La force de la couleur,
la beauté des détails.

— La natura ci stupisce
arricchendo di dettagli la pietra.

La forza del colore,
la bellezza dei particolari

Disressed wood with strength
and character in a project that
integrates different surfaces. All
the flavours of vintage style in a
contemporary key.

Gelebtes Holz, stark und
charakteristisch, in einem
Projekt, das verschiedenartige
Oberflächen umfasst. Alle
Nuancen eines Vintage-Stils im
zeitgemäßen Look.

Un bois vécu avec force et
caractère dans un projet qui
intègre différentes surfaces.
Toutes les saveurs du
style vintage dans un style
contemporain.

Un legno vissuto con forza
e carattere in un progetto
che integra superfici differenti.

Tutti i sapori dello stile vintage
in chiave contemporanea.

The classiness of large boiserie
of pure colour with delicate
nuances. The timeless elegance of
sobriety combined with creativity.

Der Stil großer Verkleidungen,
in reinen Farben mit dezenten
Nuancen. Die zeitlose Eleganz
der Schlichtheit, vereint mit
Kreativität.

La classe des grandes
boiseries de couleur pure
aux nuances délicates.
L'élégance intemporelle de la
sobriété alliée à la créativité.

La classe di grandi boiserie di puro
colore dalle nuances delicate.

L'eleganza senza tempo
della sobrietà unita alla creatività.

VANTAGGI

ADVANTAGES - LES AVANTAGES - VORTEILE - VENTAJAS - ПРЕИМУЩЕСТВА

RESISTENTE AI CARICHI PESANTI

Heavy loads resistant.
Résistant aux charges lourdes.
Beständig gegen schwere Lasten.
Resistente a las cargas pesadas.
УСТОЙЧИВА К НАГРУЗКЕ И ВЕСУ.

FACILE DA PULIRE

Easy to clean.
Facile à nettoyer.
Pflegeleicht.
Fácil de limpiar.
ПРОСТОТА ОЧИСТКИ.

RESISTENTE AGLI SBALZI TERMICI

Resistant to thermal shock.
Résistance aux écarts de températures.
Temperaturschockbeständig.
Resistente a las variaciones de temperatura.
УСТОЙЧИВА К ПЕРЕПАДАМ ТЕМПЕРАТУРЫ.

RESISTENTE AL GELO

Unchanged over the time (colour and appearance).
Inaltérable dans le temps (couleur et aspect).
Dauerhaft gleichbleibend (Farbe und Aussehen).
Invariabilidad a lo largo del tiempo (color y aspecto).
СТОЙКИЙ ЦВЕТ И ПОКРЫТИЕ (ВНЕШНИЙ ВИД ОСТАЕТСЯ НЕИЗМЕННЫМ).

RESISTENTE AGLI ACIDI

Acid resistant.
Résistant aux acides.
Säurebeständig.
Resistente a los ácidos.
УСТОЙЧИВА К ВОЗДЕЙСТВИЮ КИСЛОТ.

RESISTENTE AL SALE E SALINITÀ MARINA

Resistant to salt and marine salinity.
Résistant au sel et à la salinité marine.
Beständig gegen Salz und Meersalz.
Resistente a la sal y salinidad marina.
УСТОЙЧИВА К ВОЗДЕЙСТВИЮ СОЛИ И МОРСКОЙ СОЛИ.

LEGAME INTERNO ED ESTERNO

Continuity between indoor and outdoor.
Lien interne et externe.
Verbindung zwischen Innen- und Außenbereich.
Unión interna y externa.
ЕДИНСТВО СТИЛЯ НАПОЛЬНЫХ ПОКРЫТИЙ ИНТЕРЬЕРОВ И ТЕРРИТОРИИ ДОМА.

NON NECESSITA DI TRATTAMENTI

Does not require treatment.
Aucun traitement requis.
Braucht nicht behandelt zu werden.
No son necesarios los tratamientos.
НЕ ТРЕБУЕТ СПЕЦИАЛЬНОЙ ОБРАБОТКИ.

FACILE DA POSARE

Easy to install.
Facile à poser.
Verlegeleicht.
Fácil de colocar.
ПРОСТОТА УКЛАДКИ.

RICICLABILE

Recyclable.
Recyclable.
Recyclbar.
Recyclable.
ПОДЛЕЖИТ ВТОРИЧНОЙ ПЕРЕРАБОТКЕ.

ANTISCIVOLO

Non-slip.
Antidérapant.
Rutsicher.
Anti deslizante.
ПРОТИВОСКОльзяЩЕЕ ПОКРЫТИЕ.

INVARIABILITÀ NEL TEMPO (COLORE E ASPETTO)

Unchanged over the time (colour and appearance).
Inaltérable dans le temps (couleur et aspect).
Dauerhaft gleichbleibend (Farbe und Aussehen).
Invariabilidad a lo largo del tiempo (color y aspecto).
СТОЙКИЙ ЦВЕТ И ПОКРЫТИЕ (ВНЕШНИЙ ВИД ОСТАЕТСЯ НЕИЗМЕННЫМ).

RESISTENTE AL KARCHER (IDROPULITRICE)

Resistant to high pressure cleaner.
Résistant au Kärcher (nettoyeur haute pression).
Reinigung mit Kärcherprodukten (Hochdruckreiniger) kein Problem.
Resistente al karcher (lavado de alta presión).
ПЛИТКА УСТОЙЧИВА К МОЮЩИМ АППАРАТАМ ТИПА КАЕРШЕР.

**POSA
A SECCO
SU ERBA**

Dry laying on grass.
Pose à sec sur de l'herbe.
Trockene Verlegung auf Gras.
Colocación en seco sobre hierba.
Укладка без клея на траву.

**ELIMINARE LO STRATO
ERBOSO DI CIRCA 5-6 CM
DI PROFONDITÀ DOVE
SI INTENDE COLLOCARE
LA LASTRA**

Remove a 5-6 cm deep layer of grass where the slab is to be placed.

Éliminer la couche d'herbe d'environ 5 à 6 cm de profondeur à l'endroit où la dalle doit être placée.

Etwa 5-6 cm Rasenschicht dort entfernen, wo Sie die Platte verlegen möchten.

Eliminar la capa herbosa de alrededor de 5-6 cm de profundidad donde se pretende colocar la baldosa.

СНЯТЬ СЛОЙ ДЕРНА (ОКОЛО 5-6 СМ) В ТЕХ МЕСТАХ, ГДЕ УКЛАДЫВАЕТСЯ ПЛИТКА.

**STENDERE UNO STRATO
DI GHIAIA COMPRESO
TRA I 4 E GLI 8 CM
E COMPATTARLO**

Spread a layer of gravel of between 4 and 8 cm deep and compact into place.

Étaler une couche de gravier de 4 à 8 cm et la compacter.

Eine Kiesschicht von 4 bis 8 cm anlegen und verdichten.

Extender una capa de grava de entre 4 y 8 cm y compactar.

ЗАСЫПАТЬ ГРАВИЕМ (ОТ 4 ДО 8 СМ) И УТРАМБОВАТЬ ЕГО.

**POSIZIONARE OUT20 MM
SULLO STRATO DI GHIAIA
E BATTERE PER UNIFORMARE
LA LASTRA AL TERRENO**

Place the out20 mm on the gravel layer and tap it so that the slab is evenly positioned on the ground.

Positionner out20 mm sur la couche de gravier et tapoter pour uniformiser la dalle au sol.

Out20 mm auf die Kiesschicht verlegen und die Platte gleichmäßig auf dem Boden anklopfen.

Situar out20 mm sobre la capa de grava y batir para nivelar la baldosa en el terreno.

ПОЛОЖИТЬ ПЛИТКУ OUT20 ММ НА СЛОЙ ГРАВИЯ И ВЫРОВНЯТЬ ЕЕ В СООТВЕТСТВИИ С УРОВНЕМ ЗЕМЛИ.

POSA A SECCO SU GHIAIA

Dry laying on gravel.

Pose à sec sur le gravier.

Trockene Verlegung auf Kies.

Colocación en seco sobre gravilla.

Укладка без клея на гравий.

Rue De St Cloud
Greige Out 20 mm
59,5x59,5-23,4"x23,4"

RIMUOVERE IL TERRENO SULL' AREA IN CUI SI DESIDERA PAVIMENTARE E DISPORRE UNO STRATO DI GHIAIA SU TUTTA LA SUPERFICIE INTERESSATA

Remove the soil from the area you want to pave and place a layer of gravel over the entire surface.

Enlever la terre où l'on désire paver et disposer une couche de gravier sur toute la surface concernée.

Die Erde auf der Fläche entfernen, auf der Sie den Fußboden verlegen möchten, und eine Schicht Kies über die gesamte betroffene Fläche verteilen.

Cavar el terreno sobre el área que se desea pavimentar y extender una capa de grava sobre toda la superficie.

СНЯТЬ СЛОЙ ДЕРНА ТАМ, ГДЕ БУДЕТ УКЛАДЫВАТЬСЯ ПЛИТКА, И ЗАСЫПАТЬ ЕГО СЛОЕМ ГРАВИЯ.

PARAREGGIARE IL FONDO PER RENDERLO UNIFORME TENENDO IN CONSIDERAZIONE UNA LEGGERA PENDENZA CIRCA DEL 2-5%

The substrate must be levelled to make it uniform, taking into account a slight slope of about 2-5%.

Raser le fond pour l'uniformiser, en tenant compte d'une légère pente d'environ 2-5%.

Den Untergrund gleichmäßig ebnen, wobei eine leichte Neigung von etwa 2-5% in Betracht gezogen werden sollte.

Nivelar el fondo para que sea uniforme teniendo en cuenta una ligera pendiente del 2-5%.

РАВНОМЕРНО РАСПРЕДЕЛИТЬ ГРАВИЙ С УЧЕТОМ НЕБОЛЬШОГО НАКЛОНА (ОКОЛО 2-5%).

POSARE LA LASTRA SULLA GHIAIA E BATTERE CON UN MARTELLO DI GOMMA PER STABILIZZARE TUTTA LA PAVIMENTAZIONE

Lay the slab on the gravel and tap it with a rubber hammer to stabilize the entire flooring.

Poser la dalle sur le gravier et tapoter avec un maillet en caoutchouc pour stabiliser tout le sol.

Die Platte auf dem Kies verlegen und mit einem Gummihammer leicht anklopfen, um den gesamten Bodenbelag zu stabilisieren.

Colocar la baldosa sobre la grava y batir con un martillo de goma para nivelar todo el suelo.

ПОЛОЖИТЬ ПЛИТКУ НА ГРАВИЙ И ПОСТУЧАТЬ ПО НЕЙ РЕЗИНОВЫМ МОЛОТКОМ ДЛЯ СТАБИЛИЗАЦИИ ПОКРЫТИЯ.

POSA A SECCO SU SABBIA

Dry laying on sand.
Pose à sec sur du sable.
Trockene Verlegung auf Sand.
Colocación en seco sobre arena.
Укладка бек клея на песок.

City Grigio Out 20 mm Rett. 90x90-35,5"x35,5"

RIMUOVERE IL TERRENO SULL' AREA IN CUI SI DESIDERA PAVIMENTARE E DISPORRE UNO STRATO DI SABBIA SU TUTTA LA SUPERFICIE INTERESSATA

Remove the soil from the area you want to pave and place a layer of sand over the entire surface.

Enlever le terrain où l'on désire paver et disposer une couche de sable sur toute la surface concernée.

INDICAZIONI PER LA POSA

INDICATIONS FOR LAYING - INDICAZIONI PUOR LA POSE - HINWEISE ZUR VRLEGUNG
INDICACIONES PARA LA COLOCACIÓN - ИНСТРУКЦИИ ПО УКЛАДКЕ

PROGETTO DELLE SUPERFICI

Per valorizzare un pavimento e rivestimento ASCOT, consentendo la massima espressione delle sue qualità estetiche e tecniche, è necessario tenere conto di quei fattori che influenzano la posa in opera, come la destinazione d'uso dell'ambiente, i carichi, le sollecitazioni meccaniche, termiche, fisiche e chimiche alle quali le piastrelle saranno sottoposte, le dimensioni dell'ambiente e le eventuali pendenze. Di conseguenza, il capitolato dovrà comprendere ogni specifica del cantiere: tipo e modalità di posa, dimensione della fuga, eventuali giunti di dilatazione, giunti perimetrali, etc.

Nella scelta delle piastrelle si consiglia di valutare anche i requisiti tecnici, i formati esistenti, la destinazione d'uso e la scelta dello stucco (gli stucchi di colori forti o molto contrastati possono rendere la pulizia più laboriosa rispetto a uno stucco tono su tono).

I materiali in gres porcellanato naturale presentano una leggera scalibratura, per cui la posa sarà effettuata con una fuga tra le piastrelle di:

-2 mm per i materiali rettificati;

-3/4 mm per i prodotti naturali.

ASCOT Ceramiche sconsiglia tassativamente la posa a giunto unito e suggerisce la posa a correre con piastrelle sfalsate al massimo 10%/20%.

LA POSA IN OPERA

Prima dell'inizio della posa si consiglia di stendere a terra almeno 2 o 3 mq di materiale per verificarne l'effetto d'insieme e prelevare il materiale attingendolo da più scatole per ottenere un miglior effetto cromatico. La stonalizzazione è una caratteristica propria di alcuni prodotti ceramici. Le piastrelle non devono essere preventivamente immerse nell'acqua, né devono essere segnate sulla superficie di esercizio con matite e/o pennarelli.

Il posatore dovrà far notare e segnalare al committente e al progettista la presenza di eventuali difetti palesi (di articolo, qualità, tono, presenza di gradini o piccoli dislivelli con le piastrelle adiacenti, etc.) chiedendo l'eventuale autorizzazione a continuare il lavoro in quanto, una volta posato, il materiale non sarà più contestabile. Quindi si raccomanda di dare l'avvio alla posa in presenza del committente e del progettista.

Nel periodo compreso fra la conclusione della posa e la consegna al committente finale, la piastrellatura ceramica dovrà:

-essere mantenuta pulita e libera da cemento, sabbia, malta e da qualsiasi altro materiale che possa causare macchie e/o fenomeni di abrasione meccanica superficiale;

-protetta da danni o contaminazioni potenzialmente apportate a seguito di una prevedibile frequentazione di altri operatori edili (imbianchini, elettricisti, falegnami, etc.).

ESAME E CONTROLLO DELLA PIASTRELLATURA

L'esame ed il controllo della piastrellatura deve essere fatto dal committente finale alla presenza del posatore e del responsabile del cantiere attraverso un esame visivo con osservazione a occhio nudo (con gli occhiali, se di uso abituale) della superficie ad una distanza di 1 mt.

Un "effetto" rilevabile solo con luce radente, e solo a distanza ravvicinata, magari con l'aiuto di una lente di ingrandimento, non può essere considerato un "difetto".

Un "effetto" diventa "difetto" quando è visibile nelle condizioni di osservazione sopra riportate.

AVVERTENZA: ASCOT CERAMICHE, A MATERIALE GIÀ POSATO, NON ACCETTA CONTESTAZIONI DOVUTE A VIZI PALESI VISIBILI PRIMA DELLA POSA FINALE (ARTICOLO, QUALITÀ, TONO, CALIBRO, CURVATURA, MACCHIE, etc.) E NON RISPONDE SULLA QUALITÀ DELL'OPERA PIASTRELLATA FINITA MA SOLAMENTE SULLE CARATTERISTICHE DEL MATERIALE FORNITO.

E' BENE PERTANTO CONSERVARE, AL TERMINE DELLA POSA, ALCUNE PIASTRELLE DI SCORTA PER EVENTUALI RIPARAZIONI, O ANCHE PER DISPORRE DI UN CAMPIONE RAPPRESENTATIVO DEL MATERIALE IN CASO DI CONTESTAZIONE.

SI POSA 10%/20%

NO POSA 50%

PLANNING FOR SURFACES

To get the most from ASCOT floor and wall cladding, allowing the maximum expression of its aesthetic and technical qualities, it is necessary to take into account the factors that influence the installation, such as the intended use of the environment, the loads, the mechanical, thermal, physical and chemical stresses to which the tiles will be subjected, the dimensions of the environment and any slopes present. Consequently, the specifications must include all the details of the site: type and method of installation, width of the grout lines, necessary expansion joints, perimeter joints, etc...

When choosing tiles, it is also a good idea to evaluate the technical requirements, the existing formats, the intended use and the choice of the grout (grouts with strong or highly contrasting colours can make cleaning more difficult when compared to a tone-on-tone grout). Natural porcelain stoneware materials have slightly uneven dimensions, so the installation will be carried out with a grout line between the tiles of:

- 2 mm for rectified materials;
- 3/4 mm for natural products.

ASCOT Ceramiche strongly advises against installations with zero grout lines and suggests installation with a staggered tile at a maximum of 10%/20%.

THE INSTALLATION

Before starting the installation, it is advisable to lay down at least 2 or 3 square metres of material to check the overall effect and take the material from multiple boxes to obtain a better chromatic effect. The shading is a characteristic of some ceramic products. The tiles must not be previously immersed in water, nor should the operating surface be marked with pencils and/or felt-tip pens.

The installer will have to take note of any obvious defects (of article, quality, tone, presence of steps or small differences in level with adjacent tiles, etc.) and report them to the client and the designer, requesting authorisation before continuing work as, once laid, the material can no longer be disputed. Therefore it is recommended to start the installation in the presence of the client and the designer. In the period between the end of the installation and the delivery to the final client, the ceramic tiling must:

- be kept clean and free from cement, sand, mortar and any other material that may cause stains and/or phenomena of superficial mechanical abrasion;
- protected from damage or contamination potentially caused by the foreseeable presence of other construction professionals (painters, electricians, carpenters, etc.).

EXAMINATION AND CHECKING OF THE TILING

The examination and checking of the tiling must be done by the final customer in the presence of the installer and the site manager by means of a visual examination involving observation with the naked eye (with glasses, if normally used) of the surface at a distance of 1 m. An "effect" that can only be detected with oblique lighting, and only at close range, perhaps with the help of a magnifying glass, can not be considered a "defect".

An "effect" becomes a "defect" when it is visible under the observation conditions described above.

WARNING: ASCOT CERAMICHE, DOES NOT ACCEPT CLAIMS FOR MATERIAL ALREADY INSTALLED DUE TO DEFECTS WHICH WERE CLEARLY VISIBLE BEFORE INSTALLATION (ARTICLE, QUALITY, SHADE, CALIBER, CURVED SURFACES, STAINS, ETC.) AND SHALL NOT ASSUME RESPONSIBILITY FOR THE QUALITY OF THE TILING WORK BUT ONLY FOR THE CHARACTERISTICS OF THE SUPPLIED MATERIAL.
AT THE END OF THE INSTALLATION IT IS ALWAYS A GOOD IDEA TO KEEP SOME EXTRA TILES FOR ANY FUTURE REPAIRS, OR ALSO TO HAVE A SAMPLE OF THE MATERIAL AVAILABLE IN THE EVENT OF A DISPUTE.

INDICAZIONI PER LA POSA

INDICATIONS FOR LAYING - INDICATIONS PUOR LA POSE - HINWEISE ZUR VRLEGUNG
INDICACIONES PARA LA COLOCACIÓN - ИНСТРУКЦИИ ПО УКЛАДКЕ

PROJET DES SURFACES

Pour valoriser un sol et un revêtement ASCOT, en lui permettant d'exprimer ses qualités esthétiques et techniques au maximum, il faut tenir compte des facteurs qui influencent la pose tels que l'utilisation prévue de l'espace, les charges, les contraintes mécaniques, thermiques, physiques et chimiques auxquelles seront soumis les carreaux, les dimensions de l'espace ainsi que les éventuelles déclivités. Par conséquent, le cahier des charges devra comprendre toutes les spécifications du chantier : type et mode de pose, dimension du joint, les éventuels joints de dilatation, les joints périphériques, etc...

Lors du choix des carreaux, il est également conseillé d'évaluer les exigences techniques, les formats existants, l'usage prévu et le choix du mortier de joint (les mortiers de joint de couleurs fortes ou très contrastées peuvent rendre le nettoyage plus laborieux par rapport à un mortier de joint ton sur ton).

Les matériaux en grès cérame naturel présentent une légère différence de calibrage, de sorte que la pose se fera avec un joint entre les carreaux de :

- 2 mm pour les matériaux rectifiés ;
- 3/4 mm pour les produits naturels.

ASCOT Ceramiche déconseille fortement la pose par joint uni et suggère la pose avec des carreaux décalés de 10 % / 20 % maximum.

LA POSE

Avant de commencer la pose, il est conseillé d'étendre au sol au moins 2 ou 3 m² de matériau pour vérifier l'effet global et de prélever le matériau de plusieurs boîtes pour obtenir un meilleur effet chromatique. Le nuancage est une caractéristique propre de certains produits céramiques. Les carreaux ne doivent pas être préalablement immergés dans l'eau, ni ne doivent être marqués, sur la surface travail, au crayon et/ou feutre.

Le poseur devra faire remarquer et signaler au donneur d'ordre et au concepteur la présence d'éventuels défauts apparents (d'article, de qualité, la nuance, de présence de gradins ou de petits dénivellements avec les carreaux adjacents, etc.) en demandant l'éventuelle autorisation de continuer le travail car, une fois posé, le matériel ne pourra plus être contesté. Il est donc recommandé de commencer la pose en présence du donneur d'ordre et du concepteur.

Dans la période comprise entre la fin de la pose et la livraison au client final, le carrelage céramique devra :

- être laissé propre et exempt de ciment, de sable, de mortier et de tout autre matériau susceptible de provoquer des taches et/ou des phénomènes d'abrasion mécanique superficielle ;
- protégé contre les dommages ou contaminations pouvant potentiellement être causés par la présence prévisible d'autres opérateurs du bâtiment (peintres, électriciens, menuisiers, etc.).

EXAMEN ET CONTRÔLE DU CARRELAGE

L'examen et le contrôle du carrelage doivent être effectués par le client final en présence du poseur et du chef de chantier à travers un examen visuel à l'œil nu (ou avec des lunettes si utilisées habituellement) de la surface à une distance de 1 m.

Un "effet" qui ne peut être détecté qu'avec une lumière rasante, et seulement à distance rapprochée, ou à l'aide d'une loupe, ne peut pas être considéré comme un "défaut".

Un "effet" devient un "défaut" lorsqu'il est visible dans les conditions d'observation décrites ci-dessus.

AVERTISSEMENT : LORSQUE LE MATÉRIEL EST DÉJÀ POSÉ, ASCOT CERAMICHE, N'ACCEPTE AUCUNE CONTESTATION DUE À DES VICES APPARENTS VISIBLES, AVANT LA POSE FINALE (ARTICLE, QUALITÉ, NUANCE, CALIBRE, COURBURE, TACHES, etc.) ET N'EST PAS RESPONSABLE DE L'OUVRAGE CARRELÉ FINI MAIS SEULEMENT DES CARACTÉRISTIQUES DU MATÉRIEL FOURNI.
IL CONVIENT DONC DE CONSERVER, LORSQUE LA POSE EST FINIE, QUELQUES CARREAUX DE RÉSERVE POUR D'ÉVENTUELLES RÉPARATIONS OU POUR DISPOSER D'UN ÉCHANTILLON REPRÉSENTATIF DU MATÉRIEL EN CAS DE CONTESTATION.

OBERFLÄCHENPROJEKT

Für die optimale Aufwertung eines Fußbodens oder einer Wandverkleidung ASCOT und damit ihrer ästhetischen und technischen Qualität, müssen bestimmte Faktoren bei der Verlegung berücksichtigt werden. Dazu gehören die beabsichtigte Nutzung der Umgebung, die Belastungen, sowie die mechanischen, thermischen, physikalischen und chemischen Spannungen, denen die Fliesen ausgesetzt werden und nicht zuletzt die Abmessungen der Umgebung und eventuelle Neigungen. Dementsprechend muss die Leistungsbeschreibung jede Spezifikation der Baustelle enthalten: Art und Weise der Verlegung, Abmessung der Fuge, eventuelle Dehnungsfugen, Anschlussfugen, usw.. Bei der Wahl der Fliesen sollten auch die technischen Anforderungen, die vorhandenen Formate, der Einsatzort und die Wahl der Fugenmasse bewertet werden (Fugenmassen mit kräftigen Farben oder die stark im Kontrast zur Fliesenfarbe stehen, können die Reinigung im Vergleich zu einer Ton-in-Ton-Farbe aufwendiger machen).

Die natürlichen Feinsteinzeugmaterialien weisen leichte Unebenheiten auf, so dass die Verlegung mit einem Fugenabstand zwischen den Fliesen erfolgt:

- 2 mm für rektifizierte Materialien;
- 3/4 mm für Naturprodukte.

ASCOT Ceramiche rät dringend von der Fliese-an-Fliese-Verlegung ohne den Einsatz einer Fuge ab und empfiehlt das Verlegen mit versetzten Fliesen zu maximal 10% / 20%.

DAS VERLEGEN

Vor dem endgültigen Verlegen wird empfohlen etwa 2 oder 3 Quadratmeter Material trocken zu verlegen, um die Gesamtwirkung zu überprüfen. Entnehmen Sie dabei das Material aus verschiedenen Kartons, um einen besseren chromatischen Effekt zu erzielen. Farbabweichungen sind ein Merkmal einiger keramischer Produkte. Die Fliesen dürfen vorher nicht in Wasser eingetaucht werden, noch sollten sie auf der Oberfläche mit Bleistiften und/oder Filzstiften markiert werden.

Der Fliesenleger muss den Kunden und den Designer auf offensichtliche Mängel hinweisen (Artikel, Qualität, Farbton, Vorhandensein von Abstufungen oder kleinen Höhenunterschieden mit angrenzenden Fliesen usw.) und um Genehmigung bitten, die Arbeit fortzusetzen, da nach dem Verlegen das Material nicht mehr reklamiert werden kann. Es empfiehlt sich demnach, mit dem Verlegen in Anwesenheit des Kunden und des Designers zu beginnen.

Im Zeitraum zwischen dem Abschluss der Fliesenlegung und der Übergabe an den Endkunden muss die Keramikfliese:

- sauber und frei von Zement, Sand, Mörtel und anderen Materialien gehalten werden, die Flecken und/oder oberflächliche mechanische Abriebe verursachen könnten;
- vor Schäden oder Verschmutzung durch den möglicherweise vorhersehbaren Besuch anderer Handwerker (Maler, Elektriker, Schreiner usw.) geschützt werden.

ÜBERPRÜFUNG UND KONTROLLE DER VERFLIESUNG

Die Überprüfung und Kontrolle der verlegten Fliesen muss vom Endkunden in Anwesenheit des Fliesenlegers und des Bauleiters durch eine Sichtprüfung mit bloßem Auge (oder mit Brille, falls Brillenträger) der Oberfläche aus einer Entfernung von 1 m durchgeführt werden.

Ein "Effekt", der nur mit Streiflicht und nur aus nächster Nähe, vielleicht mit Hilfe einer Lupe, erkannt werden kann, kann nicht als "Mangel" betrachtet werden.

Ein "Effekt" wird zu einem "Mangel", wenn er unter den zuvor genannten Beobachtungsbedingungen sichtbar ist.

HINWEIS: ASCOT CERAMICHE AKZEPTIERT BEI BEREITS VERLEGTEM MATERIAL KEINERLEI REKLAMATIONEN AUFGRUND VON MÄNGELN, DIE BEREITS VOR DER ENDGÜLTIGEN VERLEGUNG SICHTBAR WAREN (ARTIKEL, QUALITÄT, FARBTON, KALIBER, BIEGUNG, FLECKEN, usw. ...) UND HAFTET NICHT FÜR DIE QUALITÄT DER ABGESCHLOSSENEN VERLEGUNG, SONDERN NUR FÜR DIE MERKMALE DES GELIEFERTEN MATERIALS. DESHALB EMPFIEHLT ES SICH, NACH DER VERLEGUNG EINIGE ERSATZFLIESEN FÜR EVENTUELLE REPARATUREN ODER AUCH ALS MUSTERSTÜCK IM FALLE EINES STREITFALLS AUFZUBEWAHREN.

INDICAZIONI PER LA POSA

INDICATIONS FOR LAYING - INDICATIONS PUOR LA POSE - HINWEISE ZUR VRLEGUNG
INDICACIONES PARA LA COLOCACIÓN - ИНСТРУКЦИИ ПО УКЛАДКЕ

PLANO DE LAS SUPERFICIES

Para añadir valor a un suelo y revestimiento ASCOT, permitiendo la máxima expresión de sus cualidades estéticas y técnicas, es necesario tener en cuenta aquellos factores que afectan a la colocación en la obra, como el uso previsto del entorno, las cargas, los esfuerzos mecánicos, térmicos, físicos y químicos a los que las baldosas serán expuestas, las dimensiones del entorno y las posibles pendientes. En consecuencia, las especificaciones técnicas deben incluir cada una de las características de la obra: tipo y modalidad de colocación, dimensión de la junta, posibles juntas de dilatación, juntas perimetrales, etc...

Al realizar la selección de las baldosas se recomienda evaluar también los requisitos técnicos, los formatos existentes, el uso previsto y la elección del estuco (los estucos de colores fuertes o con grandes contrastes pueden provocar que la limpieza sea más difícil que la de los estucos tono sobre tono).

Los materiales en gres porcelánico natural presentan una calibración ligeramente desigual por lo que la colocación se realizará con una junta entre las baldosas de:

- 2 mm para los materiales rectificadas;
- 3/4 mm para los productos naturales.

ASCOT Cerámiche desaconseja totalmente la colocación con juntas unidas y aconseja la colocación longitudinal con baldosas escalonadas con un máximo del 10%/20%.

LA COLOCACIÓN EN LA OBRA

Antes del inicio de la colocación se recomienda extender en el suelo al menos 2 o 3 metros cuadrados del material para verificar el efecto conjunto y usar el material de distintas cajas para obtener un mejor efecto cromático. La variedad tonal es una característica propia de algunos productos cerámicos. Las baldosas no se deben sumergir previamente en agua, ni tampoco se deben asentar sobre la superficie de trabajo con marcas de lápiz y/o rotulador.

El encargado de la colocación debe avisar y señalar al comitente y al proyectista la presencia de posibles defectos evidentes (en el artículo, calidad, tono, presencia de desniveles o desniveles con las baldosas adyacentes, etc.) solicitando la autorización final para continuar con el trabajo puesto que, una vez colocado, no se podrán realizar reclamaciones relativas al material. Por ello se recomienda comenzar la colocación ante la presencia del comitente y el proyectista.

Durante el periodo comprendido entre la conclusión de la colocación y la entrega final al comitente, la superficie cubierta de baldosas cerámicas deberá:

- mantenerse limpia y libre de cemento, arena, mortero y cualquier otro material que pueda causar manchas y/o fenómenos de abrasión mecánica superficial;
- ser protegida de daños o posibles contaminaciones que pueda provocar la presencia frecuente de otros operarios de construcción (pintores, electricistas, carpinteros, etc.).

EXAMEN Y CONTROL DE LA SUPERFICIE EMBALDOSADA

El comitente realizará el examen y control final de la superficie embaldosada ante el encargado de la colocación y el responsable de la obra mediante el examen visual a simple vista (con gafas si son de uso habitual) de la superficie a una distancia de 1 metro.

Un "efecto" que se pueda percibir solo con luces laterales, y solo desde una distancia cercana, quizás con la ayuda de una lupa, no se puede considerar un "defecto".

Un "efecto" se convierte en un "defecto" cuando es visible en las condiciones de observación arriba señaladas.

ADVERTENCIA: ASCOT CERAMICHE, EN EL CASO DE MATERIALES YA COLOCADOS, NO ACEPTA RECLAMACIONES DEBIDAS A DEFECTOS EVIDENTES VISIBLES ANTES DE LA COLOCACIÓN FINAL (ARTÍCULO, TONO, CALIBRE, CURVATURA, MANCHAS, etc.) Y TAMPOCO ACEPTA RESPONSABILIDADES RELACIONADAS CON LA CALIDAD DE LA OBRA EMBALDOSADA FINAL SINO SOLAMENTE SOBRE LAS CARACTERÍSTICAS DEL MATERIAL SUMINISTRADO. Y ES CONVENIENTE CONSERVAR, AL TÉRMINO DE LA COLOCACIÓN, ALGUNAS BALDOSAS DE RECAMBIO PARA POSIBLES REPARACIONES, O PARA DISPONER DE UNA MUESTRA REPRESENTATIVA DEL MATERIAL EN EL CASO DE RECLAMACIÓN.

ПРОЕКТИРОВАНИЕ ПОВЕРХНОСТЕЙ

Чтобы оценить напольную и облицовочную плитку компании ASCOT с максимальным выражением ее эстетического и технического качества, необходимо учитывать факторы, влияющие на укладку в общем, такие как место назначения, нагрузки, механические, температурные, физические и химические, которым подвергнется плитка, размер помещения и потенциальный наклон поверхностей.

Следовательно, план работ должен включать каждую особенность площадки: тип и метод укладки, размер зазора, потенциальные компенсационные соединения, периметральные расширения и т.д.

При выборе плитки рекомендуется также оценить технические требования, существующие форматы, место назначения и выбор шпатлевки (шпатлевка ярких или сильно отличающихся цветов может привести к более трудной уборке по сравнению со шпатлевкой в тон изделия).

Материалы из натурального керамогранита имеют легкое отклонение от калибровки, поэтому укладка производится с зазором между плитками:

- 2 мм для ректифицированных материалов;

- 3/4 мм для натуральных продуктов.

ASCOT Ceramiche настоятельно не рекомендует бесшовную укладку и советует метод палубной укладки плиток макс. 10%/20%.

УКЛАДКА

Перед тем, как начать укладку, рекомендуется расположить на земле хотя бы 2 или 3 кв. м материала, чтобы проверить, как плитка смотрится вместе, и выбрать материал из большего количества коробок для достижения лучшего эффекта в плане цвета.

Потеря оттенка это особая характеристика некоторых керамических продуктов.

Плитку не нужно погружать в воду перед работой, а также пробовать карандашом и/или фломастерами.

Укладчик должен указать заказчику и проектировщику на наличие возможных очевидных дефектов (единицы продукта, качества, оттенка, наличие сколов или небольших неровностей при укладке рядом с другими плитками, и т.д.), попросив при этом потенциальное разрешение на продолжение работ, пока уложенный материал не будет соответствовать норме.

Таким образом, рекомендуется начинать работы по укладке в присутствии заказчика и проектировщика.

В период между завершением укладки и сдачи работ конечному заказчику плитка должна:

- сохраняться в чистом виде, освобожденная от цемента, песка, раствора и любого другого материала, который мог бы оставить пятна и/или механически повредить поверхность;

- быть защищена от повреждений или загрязнений, потенциально нанесенных вследствие передвижения других рабочих стройки (маляров, электриков, столяров и т.д.).

АНАЛИЗ И КОНТРОЛЬ УЛОЖЕННОЙ ПЛИТКИ

Анализ и контроль плитки должны проводиться конечным заказчиком в присутствии укладчика и начальника стройки посредством визуального осмотра невооруженным глазом (в очках, если человек их носит постоянно) поверхности на расстоянии 1 м.

Эффект, наблюдаемый только при ярком освещении и только при близком рассмотрении и с использованием лупы не может считаться дефектом.

Эффект становится дефектом только тогда, когда он виден при условиях, описанных выше.

ПРЕДУПРЕЖДЕНИЕ: ASCOT CERAMICHE ПОСЛЕ ЗАВЕРШЕНИЯ УКЛАДКИ, НЕ ПРИНИМАЕТ ПРЕТЕНЗИИ ПО ЯВНЫМ НЕСОВЕРШЕНСТВАМ, ВИДИМЫМ ПЕРЕД ОКОНЧАТЕЛЬНОЙ УКЛАДКОЙ (ЕДИНИЦА ПРОДУКТА, КАЧЕСТВО, ОТТЕНОК, КАЛИБР, ИЗГИБ, ПЯТНА, И Т.Д.)

И НЕ ОТВЕЧАЕТ ЗА КАЧЕСТВО КОНЕЧНОЙ УКЛАДКИ ПЛИТКИ, А ТОЛЬКО ЗА КАЧЕСТВО ПОСТАВЛЕННОГО МАТЕРИАЛА.

ПОЭТОМУ НЕОБХОДИМО СОХРАНИТЬ, ПО ОКОНЧАНИИ УКЛАДКИ, НЕСКОЛЬКО ЗАПАСНЫХ ЕДИНИЦ ПЛИТКИ ДЛЯ ВОЗМОЖНОГО РЕМОНТА, ИЛИ ЖЕ ДЛЯ ТОГО, ЧТОБЫ ИМЕТЬ ОБРАЗЕЦ МАТЕРИАЛА В СЛУЧАЕ ПРЕТЕНЗИЙ.

TECNOLOGIE

TECHNOLOGIES - TECHNOLOGIES - TECHNOLOGIEN - TECNOLOGÍAS - ТЕХНОЛОГИИ

BITECH®: CERAMICA PORCELLANATA

Il supporto di BITECH® viene realizzato attraverso nuove tecnologie e innovativi impianti produttivi che ne esaltano le valenze estetiche oltre che funzionali, realizzando una sintesi tra la migliore tradizione ceramica e le più sofisticate tecnologie.

BITECH®: PORCELAIN GLAZE CERAMIC TILE

BITECH® tile bodies are produced with state-of-the-art technology implemented in innovating manufacturing plants that enhance the products aesthetic and functional properties, achieving a combination of the best tile traditions and advanced modern technological know-how.

BITECH®: CARREAU PORCELAINE

Le support de BITECH® est réalisé grâce à de la dernière technologie et des installations de production sophistiquées qui exaltent ses valeurs esthétiques et fonctionnelles. Il y a ainsi une synthèse entre la meilleure tradition céramique et les technologies les plus sophistiquées.

BITECH®: PORZELLANKERAMIK

Der Scherben von BITECH® wird mit Hilfe neuer Technologien und erneuernder Produktionsanlagen gefertigt, die nicht nur die ästhetischen, sondern auch die benutzerfreundlichen Qualitäten herausstellen, wodurch eine Verbindung zwischen der besten Keramik-Tradition und den hochmodernsten Technologien hergestellt wird.

BITECH®: CERÁMICA PORCELÁNICA

El soporte de BITECH® se realiza con nuevas tecnologías e innovadoras instalaciones de producción, que exaltan su valor estético y funcional, realizando una síntesis entre la mejor tradición cerámica y las más sofisticadas tecnologías.

ГЛАЗУРОВАННЫЙ КЕРАМОГРАНИТ BITECH®

Поддержка BITECH® реализуется посредством новых технологий и инновационного производственного оборудования, способствующего выражению не только функциональной, но и эстетической ценности, и создающего в мире керамики союз лучших традиций и самых передовых технологий.

PORCELLANATO SMALTATO

La resistenza garantita dal porcellanato, si unisce alla valenza estetica della superficie sottoposta a procedimenti di smaltatura per ottenere un prezioso e versatile elemento d'arredo, capace di interpretare ogni stile e ogni colore.

GLAZED PORCELAIN STONEWARE

The strength guaranteed by porcelain combines with the attractive finish of a surface subjected to glazing procedures to obtain a precious and versatile furnishing complement that can interpret every style and color.

GRÈS CÉRAME EMAILLÉ

La résistance garantie par le grès cérame, s'allie à la valeur esthétique de la surface soumise à des procédés d'émaillage pour obtenir un élément de décoration précieux et polyvalent, capable d'interpréter tout style et chaque couleur.

GLASIERTES FEINSTEINZEUG

Die garantierte Festigkeit des Steinzeugs kombiniert sich mit dem ästhetischen Wert der Oberfläche, die glasiert wird, um ein wertvolles und vielseitiges Einrichtungselement zu erhalten, das sich jedem Stil und jeder Farbe anpassen kann.

GRES PORCELÁNICO ESMALTADO

La resistencia ofrecida por el gres porcelánico se conjuga con el valor estético de la superficie, la cual es sometida a procesos de esmaltado que la transforman en un elemento valioso y versátil de decoración, capaz de interpretar todo tipo de estilo en todos los colores.

КЕРАМОГРАНИТ, ПОКРЫТЫЙ СМАЛЬТОЙ

Прочность, гарантированная гранитом, объединяется с эстетической ценностью поверхности, подвергшейся процессу покрытия смальтой, для получения ценного и универсального элемента убранства, способного выразить лучшим образом любой стиль и любой цвет.

PORCELLANATO IMPASTO COLORATO

E' la fabbricazione industriale della pietra naturale, ma con una maggiore resistenza, prestazioni d'uso irraggiungibili, estrema facilità di posa e di manutenzione. Viene lavorato come una pietra naturale e può essere utilizzato in tutti gli ambienti pubblici e privati.

THROUGH-BODY DYED PORCELAIN

It's like industrially manufactured natural stone, but with greater strength and hitherto unattainable performances while being extremely easy to lay and service. The material is worked in the same way as natural stone and can be used in all private and public settings.

GRÈS COLORÉ DANS LA MASSE

C'est la fabrication industrielle de la pierre naturelle, mais avec une plus grande résistance, des performances d'utilisation inégalables, une facilité de pose et d'entretien extrême. Travaillé comme une pierre naturelle, il peut être utilisé dans tous les espaces publics et privés.

DURCHGEFÄRBTES STEINZEUG

Das ist die industrielle Fertigung von Natursteinen, aber mit höherer Beständigkeit, unerreichbaren Einsatzleistungen, sehr einfacher Verlegung und Pflege. Wird wie ein Naturstein verarbeitet und eignet sich zum Verlegen in allen Privat- und Objektbereichen.

GRES PORCELÁNICO DE COLOR

Representa la elaboración industrial de la piedra natural, pero ofrece una mayor resistencia, incomparables prestaciones de empleo y la máxima facilidad de colocación y mantenimiento. Está trabajado como una piedra natural y se puede emplear en todos los ambientes públicos y privados.

КЕРАМОГРАНИТ, ОКРАШЕННЫЙ ПО ВСЕЙ МАССЕ

Это промышленное производство натурального камня, чья прочность выше, способы эксплуатации безграничны, укладка и техническое обслуживание просты. Обрабатывается как натуральный камень и может быть использован в любом месте: как в публичных местах, так и в жилых домах.

DIGITAL TECHNOLOGY BITECH / DIGITAL TECHNOLOGY PORCELLANATO

Ascot si conferma protagonista fra le imprese proiettate nel futuro del Made in Italy e conquista le nuove frontiere della ceramica con Digital Technology, la tecnologia di nuova generazione oggi disponibile, che rivoluziona il concetto stesso di decorazione: pezzi ognuno diverso dall'altro, altissima definizione, perfetta decorazione delle superfici strutturate, valorizzazione della luminosità e della profondità, sensazione calda al tatto. Con ASCOT la bellezza della tradizione diventa innovazione e design d'avanguardia.

DIGITAL TECHNOLOGY

ASCOT confirms its standing as protagonist amongst those future-oriented enterprises spearheading the endeavour to develop the "Made in Italy" concept and conquers new frontiers in the ceramic world with Digital Technology, the new generation technology now available, that revolutionizes the very idea of decoration: pieces that are different from each other, ultra-high definition, perfectly decorated textured surfaces, luminosity and depth enhanced to the utmost degree, a feeling of warmth to the touch. ASCOT turns the beauty of tradition into innovation and avant garde design.

TECHNOLOGIE NUMÉRIQUE

Ascot se confirme la protagoniste parmi les entreprises projetées dans le futur du Made in Italy en conquérant les nouvelles frontières de la céramique avec Digital Technology, la technologie de dernière génération, qui révolutionne le principe même de la décoration : chaque élément est différent de l'autre, la très haute définition, la décoration parfaite des surfaces structurées, la mise en valeur de la luminosité de la profondeur, une sensation chaude au toucher. Avec ASCOT la beauté de la tradition devient innovation et design d'avant-garde.

DIGITALTECHNIK

Ascot ist weiterhin Protagonist unter den zukunftsorientierten Unternehmen des Made in Italy und erobert die neuen Grenzen der Keramik mit der Digital Technology, einer Technologie der letzten Generation, die heute zur Verfügung steht und das Konzept der Dekoration revolutioniert: Jedes Teil fällt anders als das vorherige aus, ganz hohe Auflösung, perfekte Dekoration der strukturierten Flächen, mehr Leuchtkraft und Tiefe, ein warmes Tastgefühl. Mit ASCOT wird die Schönheit der Tradition jetzt Innovation und wegweisendes Design.

TECNOLOGÍA DIGITAL

Ascot se confirma protagonista entre las empresas proyectadas hacia el futuro del Made in Italy y conquista nuevas fronteras en el ámbito de la cerámica con Digital Technology, la tecnología de nueva generación hoy disponible, que revoluciona el concepto mismo de la decoración: piezas cada una diferente de las otras, altísima definición, perfecta decoración de las superficies estructuradas, valorización de la luminosidad y de la profundidad, sensación cálida al tacto. Con ASCOT la belleza de la tradición se convierte en innovación y diseño de vanguardia.

ЦИФРОВАЯ ТЕХНОЛОГИЯ

Ascot остается главным героем среди компаний, спроецированных в будущем Made in Italy и завоевывает новые границы на рынке керамики с помощью Digital Technology, доступной сегодня технологии нового поколения, изменившей само понятие о дизайне: отличные одна от другой плитки, высочайшая четкость, идеальное декорирование структурированных поверхностей, освоение яркости и глубины.

С ASCOT красота традиции становится инновацией и авангардом с точки зрения дизайна.

TECNOLOGIE

TECHNOLOGIES - TECHNOLOGIES - TECHNOLOGIEN - TECNOLOGÍAS - ТЕХНОЛОГИИ

PERCHÈ BITECH®

BITECH® è una scelta precisa in un mercato sempre più omologato; la sfida di credere nel nostro know-how, nelle tradizioni, nella passione per la ceramica vera. Ascot ceramiche è una delle poche realtà ceramiche del distretto Sassolese ad aver scelto di investire e credere in questo processo produttivo che fa parte della nostra storia. La tecnologia produttiva BITECH® è complessa e integra il sistema di doppia cottura unico nel settore, con la tecnologia digitale più evoluta ed innovativa.

I nostri impianti vengono continuamente aggiornati al passo con tutte le nuove tecnologie e permettono di realizzare prodotti originali e materici. Ascot ceramiche dispone di un laboratorio ricerca e di un impianto produttivo che si occupa esclusivamente di bicottura.

Nel laboratorio BITECH® si studiano le nuove collezioni, si ricercano effetti, materie nuove e si sviluppano graficamente i concept dell'ufficio stile Ascot.

- La ceramica BITECH® offre un'ampia gamma di colori, effetti materici impossibili da ottenere con altre tecnologie.
- Nei prodotti lucidi si utilizzano smalti con una brillantezza superiore ai rivestimenti realizzati in Gres Porcellanato.
- Le superfici sono resistenti all'attacco chimico dei prodotti comuni per la pulizia della casa e degli alimenti (Classe BIII piastrelle ceramiche normativa UNI-EN-ISO).
- BITECH® propone un'ampia gamma di formati Monocalibro (range di tolleranza +/-2mm), perfettamente rettangolari.
- Il prodotto è leggero e si contraddistingue per la facilità di posa anche per utenti non esperti (fai da te).
- BITECH® è un materiale unico: una convessità minima (0.8-1.2 mm lato lungo) non comporta problemi sul risultato finale; la sua natura flessibile unita all' "Effetto Ventosa" che contraddistingue le colle da rivestimento, permette un'adesione perfetta al piano del muro.
- La leggera raggiatura dei bordi aiuta la posa evitando spigolature.
- La facilità di pulitura di questo materiale garantisce un alto livello di igiene delle superfici.
- Ogni lotto di produzione viene controllato qualitativamente da squadre di esperti che ne assicurano uno standard qualitativo inimitabile.

CERAMICHE BITECH®

Il rivestimento BITECH® Ascot ceramiche propone una palette di colori ricca e variegata difficilmente realizzabili in ceramica. Effetti materici ottenibili esclusivamente con questo processo che avvicinano il nostro prodotto ad un prodotto semi-artigianale.

Subendo una doppia cottura i nostri rivestimenti sono monocalibro cioè' hanno una sola misura.

La nostra tecnologia permette di ottenere decorazioni sviluppate su più pezzi, perfettamente combinabili e continue, esteticamente preziose.

La nostra BITECH® e' leggera, ottenuta con materiali puri e bianchi, facilmente posabile e maneggiabile e di facile manutenzione.

LA CERAMICA DELLA TRADIZIONE REALIZZATA CON LE TECNOLOGIE PIÙ MODERNE

Il rivestimento BITECH® Ascot propone una palette di colori ricca e variegata difficilmente realizzabili in ceramica. Effetti materici ottenibili esclusivamente con questo processo che avvicinano il nostro prodotto ad un prodotto semi-artigianale.

Subendo una doppia cottura i nostri rivestimenti sono monocalibro cioè' hanno una sola misura.

La nostra tecnologia permette di ottenere decorazioni sviluppate su più pezzi, perfettamente combinabili e continue, esteticamente preziose.

La nostra BITECH® e' leggera, ottenuta con materiali puri e bianchi, facilmente posabile e maneggiabile e di facile manutenzione.

WHY BITECH®

BITECH® is a resolute decision in a market which is increasingly lacking individuality; the challenge of believing in our know-how, traditions and passion for real ceramics.

Ascot ceramiche is one of the few ceramic companies in the Sassuolo district to have chosen to invest and believe in this production process that constitutes a part of our history and tradition.

BITECH® production technology is complex and integrates a double-firing system which is unique to the sector, with the most advanced and innovative digital technologies.

Our systems are continuously modernised in line with all new technologies and allows the creation of original and textured products.

Ascot ceramiche has a research laboratory and a production facility that deals exclusively with double firing.

In the BITECH® laboratory the new collections are studied, research is conducted on different effects, new materials are developed and the Ascot style department concept is graphically conceived.

- BITECH® ceramics offer a wide range of colours and material effects that are impossible to obtain with other technologies.
- The gloss products are manufactured with glazes that have a higher degree of shine than claddings made in Porcelain Stoneware.
- The surfaces are resistant to chemical deterioration from common household cleaning products and food (Class BIII ceramic tiles pursuant to UNI-EN-ISO).
- BITECH® offers a wide range of Monocalibre formats (tolerance range +/-2mm), which are perfectly rectangular.
- The product is light and stands out due to its ease of installation even for non-expert users (DIY).
- BITECH® is a unique material: minimal convexity (0.8-1.2 mm long side) does not cause problems with the final result; its flexible nature combined with the "Sucker Effect" that distinguishes the adhesives used for cladding, allows a perfectly flat adhesion to the wall.
- The slight radius of the edges aids installation avoiding sharp corners.
- The ease of cleaning of this material guarantees a high level of surface hygiene.
- Each production batch is qualitatively controlled by teams of experts who ensure an unparalleled quality standard.

BITECH® CERAMICS

The BITECH® Ascot ceramiche coating offers a rich and varied colour palette that is difficult to produce with ceramics.

Textured effects which can only be achieved with this process that brings our products closer to a semi-handmade product.

The tiles are subjected to double firing and therefore our products are monocalibre, i.e. there is only one size.

Our technology allows decorations to be achieved which are developed on several pieces, perfectly coordinated and continuous, aesthetically delightful.

Our BITECH® is light, obtained with pure white materials, easy to lay, handle and maintain.

POURQUOI BITECH®

BITECH® constitue un choix précis dans un marché toujours plus homogène, et représente le défi de croire en notre savoir-faire, nos traditions et notre passion pour la véritable céramique. Ascot ceramiche est l'une de ces quelques sociétés établies à Sassuolo, qui a choisi d'investir dans un processus de production ancré dans notre histoire, et de le suivre à la lettre.

La technologie de production BITECH® est complexe : la société est en effet la seule à procéder à un système à double cuisson dans le secteur et à employer la technologie numérique la plus avancée et innovante. Nos machines de fabrication sont continuellement mises à jour, afin de toujours correspondre aux processus de production et aux technologies les plus actuels, pour obtenir des produits originaux et texturés. Ascot ceramiche dispose d'un laboratoire de recherche et d'une unité de production qui s'occupe exclusivement de la double cuisson. Au cœur du laboratoire BITECH®, les nouvelles collections sont examinées, les effets texturés des surfaces y sont créés, de nouveaux matériaux sont étudiés et les concepts du bureau style de Ascot y sont graphiquement développés.

- La céramique BITECH® offre une large gamme de couleurs et des effets reprenant les textures des matériaux, qui ne pourraient être possibles en utilisant d'autres technologies.
- Pour les produits brillants, des vernis d'une brillance supérieure aux revêtements du grès cérame sont utilisés.
- Les surfaces sont résistantes aux agents chimiques des produits domestiques courants employés pour le nettoyage de la maison et de la nourriture (carrelages en céramique de classe BIII conformes à la norme UNI-EN-ISO).
- BITECH® propose une large gamme de formats monocalibres (plage de tolérance : +/- 2 mm), parfaitement rectangulaires.
- Le produit est léger et se distingue par sa facilité d'installation, même pour les utilisateurs non expérimentés (bricoleurs amateurs).
- BITECH® est un matériau unique : les bords légèrement convexes (de 0,8 à 1,2 mm sur les bords longs) n'affectent pas le résultat final ; sa nature flexible, combinée à « l'effet ventouse », permet, grâce à l'emploi d'adhésifs spécifiques pour les revêtements, une parfaite adhérence sur la surface du mur.
- Les coins sont légèrement profilés pour éviter tout risque d'ébréchure.
- Le nettoyage facile de ce matériau garantit un haut niveau d'hygiène des surfaces.
- Chaque lot de production est contrôlé qualitativement par des équipes d'experts qui garantissent un standard de qualité inimitable.

CARRELAGES BITECH®

Le revêtement BITECH® Ascot offre un riche éventail de couleurs variées, difficile à obtenir dans le secteur de production de la céramique. Grâce à un processus de fabrication unique, les surfaces arborent des aspects et textures semblables aux matériaux, obtenant ainsi un produit quasiment semi-artisanal. Soumis à une double cuisson, nos revêtements sont exclusivement monocalibres, ils sont donc proposés en une seule et unique dimension. Notre technologie permet d'obtenir des décors qui s'étendent sur plusieurs éléments, parfaitement combinables et continus, et esthétiquement précieux. Notre produit BITECH® est léger, obtenu à partir de matériaux purs et blancs, facile à poser, facile à manipuler et facile à entretenir. Notre technologie permet d'obtenir des décors qui s'étendent sur plusieurs éléments, parfaitement combinables et continus, et esthétiquement précieux. Notre produit BITECH® est léger, obtenu à partir de matériaux purs et blancs, facile à poser, facile à manipuler et facile à entretenir.

WARUM BITECH®

BITECH® ist eine präzise Wahl auf einem Markt, der zunehmend vereinheitlicht wird; es ist die Herausforderung an unser Know-how, unsere Traditionen und unsere Leidenschaft für echte Keramik zu glauben.

Ascot ceramiche ist eine der wenigen Keramikfabriken im Gebiet Sassuolo, die sich dazu entschieden haben, in diesen Produktionsprozess zu investieren, der Teil unserer Geschichte ist. Die BITECH®-Produktionstechnologie ist komplex und integriert das Doppelbrennsystem, -welches einzigartig in der Branche ist-, mit der fortschrittlichsten und innovativsten Digitaltechnologie.

Unsere Systeme werden kontinuierlich mit allen neuen Technologien aktualisiert und erlauben die Realisierung von originellen und materiellen Produkten. Ascot ceramiche verfügt über ein Forschungslabor und eine Produktionsanlage, die sich ausschließlich mit Zweibrandverfahren beschäftigt. Im BITECH®-Labor werden die neuen Kollektionen entworfen, neue Materialeffekte gesucht, neue Materialien entwickelt und die Konzepte des Designbüros der ASCOT grafisch weiterentwickelt.

- Die BITECH® Keramik bietet ein breites Angebot an Farben und Materialeffekten, die mit anderen Technologien nicht erreicht werden können.
- Bei den glänzenden Produkten werden Glasuren verwendet, deren Glanz im Vergleich zu den bei Feinsteinzeug realisierten Beschichtungen wesentlich höher ist.
- Die Oberflächen sind resistent gegen den chemischen Angriff von handelsüblichen Reinigungsprodukten für Haus und Lebensmittel (Klasse BIII Keramikfliesen UNI-EN-ISO Standard).
- BITECH® bietet eine große Auswahl an Monokaliber-Formaten (Toleranzbereich +/- 2mm), perfekt rechteckig.
- Das Produkt ist leicht und zeichnet sich durch seine einfache Verlegung auch für Nichtfachleute (Heimwerker) aus.
- BITECH® ist ein einzigartiges Material: Die minimale Konvexität (0,8-1,2 mm lange Seite) verursacht keine Probleme beim Endergebnis; die flexible Beschaffenheit kombiniert mit dem "Saugnapf-Effekt", der die Beschichtungs-Klebstoffe auszeichnet, erlauben eine perfekte Haftung an der Wandfläche.
- Der leichte Radius der Kanten hilft beim Verlegen und vermeidet scharfe Kanten.
- Die leichte Reinigung dieses Materials garantiert eine hohe Oberflächenhygiene.
- Jedes Produktionslos wird qualitativ von Expertenteams kontrolliert, die einen unnachahmlichen Qualitätsstandard gewährleisten.

BITECH® KERAMIK

Die BITECH® Ascot ceramiche-Beschichtung bietet ein reiches Angebot an vielfältigen Farben, die in der Keramik schwierig herzustellen sind. Materielle Effekte, die ausschließlich mit diesem Verfahren erzielt werden und unser Produkt näher an ein von Hand gefertigtes Produkt bringen. Unsere Beschichtungen werden im Zweibrandverfahren hergestellt und sind demnach Monokaliber, d.h. sie haben nur eine Größe. Unsere Technologie ermöglicht es, Dekorationen zu erhalten, die sich über mehrere Fliesen entwickeln, perfekt kombinierbar und durchgehend sind und damit ein ästhetisch hochwertiges Ergebnis erlauben.

Unser BITECH® ist leicht, aus reinen und weißen Materialien, einfach zu verlegen, leicht zu handhaben und pflegeleicht.

PORQUÉ BITECH®

BITECH® es la elección adecuada en un mercado que cada vez cuenta con un mayor número de controles; el reto de creer en nuestro conocimiento, las tradiciones y la pasión por la verdadera cerámica. Ascot ceramiche es uno de los pocos productores de cerámica de la región de Sassuolo que eligió invertir y creer en este proceso productivo que forma parte de nuestra historia. La tecnología productiva de BITECH® es compleja e incluye el sistema de cocción doble único en el sector con la tecnología más avanzada e innovadora. Nuestras instalaciones se mantienen actualizadas con todas las nuevas tecnologías, permitiendo que podamos realizar productos y materiales originales. Ascot ceramiche cuenta con un laboratorio de investigación y una planta de producción que se ocupa exclusivamente de la doble cocción. En el laboratorio BITECH® se estudian las nuevas colecciones, se investigan efectos, materias nuevas y se desarrollan gráficamente los conceptos de la oficina con estilo de ASCOT.

- La cerámica Bitech® ofrece una amplia gama de colores y efectos sobre los materiales que no se pueden lograr con otras tecnologías.
- En los productos brillo se usan esmaltes con una brillantez superior a los revestimientos realizados en gres porcelánico.
- Las superficies son resistentes al ataque químico de los productos convencionales usados para la limpieza del hogar y de los alimentos (Clase BIII baldosas cerámicas normativa UNI-EN-ISO).
- BITECH® propone una amplia gama de formatos monocalibre (intervalo de tolerancia +/-2mm), totalmente rectangulares.
- El producto es ligero y sobresale por su facilidad de colocación incluso para personas que no son expertas (un trabajo manual sencillo).
- BITECH® es un material único: una convexidad mínima (0.8-1.2 mm lado largo) que no conlleva problemas en el resultado final; su naturaleza flexible junto al "Efecto ventosa" que distingue a las colas para revestimiento permiten una adhesión perfecta al plano de la pared.
- El delicado redondeo de los bordes ayuda a la colocación evitando imperfecciones.
- La facilidad de limpieza de este material garantiza un alto nivel de higiene en las superficies.
- Un equipo de expertos controla la calidad de cada lote de fabricación asegurando un estándar cualitativo inimitable.

CERÁMICA BITECH®

El revestimiento de BITECH® Ascot propone una gama de colores rica y variada que es difícil obtener en la cerámica. Efectos materiales logrados exclusivamente gracias a este proceso que hace que nuestros productos se asemejen a un producto semi artesanal. Sometidos a una cocción doble, nuestros revestimientos son monocalibres, es decir, tienen una sola medida. Nuestra tecnología permite obtener decoraciones desarrolladas sobre más piezas, perfectamente combinables y continuas, con una gran belleza desde el punto de vista estético. BITECH® es ligero y se obtiene a partir de materiales puros y blancos, de fácil colocación y manejo y mantenimiento sencillo.

ПОЧЕМУ ВІТЕСН®

ВІТЕСН® — это точный выбор на все больше ратифицированном рынке; мы предлагаем поспорить о вере в ноу-хау, традиции и увлечении настоящей керамикой.

Группа компаний ASCOT — это одна из немногих реалий в мире керамики округа Сассуоло, выбравших инвестиции и веру в этот производственный процесс, являющийся частью нашей истории.

Производственная технология ВІТЕСН® сложная и объединяет систему двойного обжига, неповторимую в данном секторе, с инновационной цифровой технологией.

Наше оборудование постоянно обновляется и идет в ногу с новыми технологиями, что позволяет реализовать оригинальную и фактурную продукцию.

У ASCOT есть исследовательская лаборатория и производственное оборудование, которое занимается исключительно двойным обжигом.

В лаборатории ВІТЕСН® разрабатываются новые коллекции, исследуются различные эффекты, новые материи и развиваются концепты отдела стиля группы Ascot.

- Керамика Bitech® предлагает широкий выбор цветов, фактурных эффектов, добиться которых невозможно с помощью других технологий.
- В глянцевой продукции используются лаки с более высоким эффектом блеска по сравнению с облицовочными материалами из керамогранита.
- Поверхности устойчивы к применению химической продукции для уборки дома и пищевым продуктам (Класс VIII керамическая плитка норматива UNI-EN-ISO)
- Bitech® предлагает широкий выбор форматов Monocalibro (диапазон допустимых отклонений +/-2mm), идеально квадратных.
- Продукт мало весит и отличается простотой укладки даже для непрофессионалов (из серии «сделай сам»).
- Bitech® — это цельный материал: минимальная выпуклость (0,8-1,2 мм в длину) не отражается на конечном результате; его гибкая природа, объединенная с "Effetto Ventosa", который отличает облицовочные клеи, способствует идеальному креплению к стене.
- Легкий радиусный стык плитки способствует простой укладке без образования уголков.
- Простота очистки этого материала гарантирует высокий уровень гигиены поверхностей.
- Каждая партия продукции находится под контролем команды экспертов, которые обеспечивают неповторимый стандарт качества.

КЕРАМИКА ВІТЕСН®

Облицовочная продукция ВІТЕСН® от ASCOT предлагает богатую и разнообразную палитру цветов, что редко встречается на рынке керамики. Фактурные эффекты, достигаемые только посредством этого процесса, приближают нашу продукцию к полуремесленной.

Подвергаясь двойному обжигу, наши облицовочные материалы монокалиберны, то есть, имеют всего один размер.

Наша технология позволяет получить декоры, нанесенные на большее количество плиток, которые идеально комбинируются между собой и являются продолжением других, что ценно с эстетической точки зрения.

Наша продукция ВІТЕСН® легкая, реализована из чистых белых материалов, проста в укладке и обращении, а также в обслуживании.

ТРАДИЦИОННАЯ КЕРАМИКА, РЕАЛИЗОВАННАЯ С ПОМОЩЬЮ САМЫХ СОВРЕМЕННЫХ ТЕХНОЛОГИЙ

Облицовочная продукция ВІТЕСН® от ASCOT предлагает богатую и разнообразную палитру цветов, что редко встречается на рынке керамики. Фактурные эффекты, достигаемые только посредством этого процесса, приближают нашу продукцию к полуремесленной.

CONDIZIONI GENERALI DI VENDITA

1. NORMATIVA CONTRATTUALE

Le presenti condizioni generali, salvo modificazioni o deroghe concordate per iscritto, disciplinano tutti i contratti di vendita fra Ascot Gruppo Ceramiche S.r.l. e l'Acquirente.

Le variazioni delle condizioni generali di vendita, le offerte, gli accrediti o gli abbuoni accordati dai nostri agenti o altri intermediari, non sono validi se non accettate per iscritto dalla nostra sede.

Se una o più parti delle presenti condizioni risultassero invalide, le condizioni generali resteranno valide nel loro complesso; le parti invalide saranno sostituite con pattuizioni che si avvicinano quanto più possibile alla originaria volontà delle parti.

Ogni offerta, ogni accettazione d'ordine ed ogni consegna da parte del Venditore si intende fatta alle presenti condizioni, salvo espressa deroga scritta a firma del Venditore stesso; l'accettazione di tali offerte e la presa in consegna di prodotti provenienti dal Venditore implica pertanto l'accettazione da parte degli acquirenti delle presenti condizioni integrate dalle eventuali pattuizioni scritte tra le parti.

L'esecuzione del contratto di vendita è convenzionalmente stabilita aver luogo nella sede del Venditore.

2. OGGETTO DELLA FORNITURA E CONFERMA D'ORDINE

Le illustrazioni e le descrizioni dei cataloghi e dei listini, tutte le nostre pubblicazioni ed i campionari non sono impegnativi ma puramente indicativi. Le dimensioni dei prodotti soggetti a calibro, in particolare dei pavimenti in porcellana dura smaltata e gres-porcellanato, sono da intendersi con le tolleranze d'uso.

Le tonalità dei materiali s'intendono sempre approssimative e le eventuali differenze di tonalità non costituiscono difetto del materiale e non possono essere denunciate come tali.

Misure, pesi e caratteristiche indicate nei nostri listini debbono intendersi indicativi.

La fornitura comprende solamente le prestazioni, i materiali ed i quantitativi specificati nella conferma d'ordine o in altre comunicazioni scritte provenienti dal Venditore. Il testo della conferma d'ordine del Venditore prevarrà in ogni caso sul testo difforme dell'eventuale offerta o dell'ordinazione.

L'ordine non confermato per iscritto in nessun caso potrà intendersi accettato, salvo esecuzione del medesimo da parte del Venditore mediante comunicazione scritta di merce pronta, di spedizione o mediante consegna dei prodotti.

L'esecuzione parziale dell'ordine senza preventiva conferma, non significa approvazione per l'intero ordine, bensì approvazione parziale relativamente alla merce consegnata. In questo caso la consegna della merce al vettore equivarrà ad accettazione da parte dell'Acquirente della nuova proposta contrattuale.

Merci ordinate per errore o ordinate in eccedenza da parte dell'Acquirente, come pure quelle invendute, non vengono ritirate da parte del Venditore.

3. CONSEGNE

La consegna si intende eseguita presso lo stabilimento del Venditore in Solignano di Castelvetro (MO). La merce viaggia sempre a rischio e pericolo dell'Acquirente ed ogni nostra responsabilità cessa con la consegna al vettore. Sono quindi a carico del Compratore anche i rischi di eventuali rotture, manomissioni e/o deterioramenti.

Le spedizioni, via mare o via terra, concernenti forniture sull'estero, vengono effettuate in base alle condizioni scelte di volta in volta, riportate negli "Incoterms" approvati dalla Camera di Commercio Internazionale.

4. TERMINI DI CONSEGNA

Il termine stabilito per la consegna della merce deve intendersi a favore di entrambi i contraenti.

I termini di consegna sono solamente indicativi e non perentori. Eventuali ritardi nelle consegne, interruzioni, sospensioni totali o parziali delle forniture non daranno diritto al Compratore ad annullare ordini o a pretendere il risarcimento di eventuali danni diretti o indiretti.

Il Venditore si riserva espressamente di poter eseguire consegne parziali a fronte di ciascun ordine.

Quando siano intervenute modificazioni al contratto, il termine è prorogato per un periodo uguale a quello inizialmente stabilito.

In caso di ritardo nelle consegne superiore a 30 giorni l'Acquirente potrà, dopo una rituale messa in mora, rifiutare ulteriori consegne e recedere dal contratto per la parte dei prodotti non ancora consegnata. Il recesso dal contratto per la parte non consegnata a cagione di ritardo dà luogo al pagamento dei soli prodotti effettivamente consegnati restando escluso ogni ulteriore risarcimento o indennizzo.

5. FORZA MAGGIORE

Il Venditore non è responsabile nei confronti dell'Acquirente per il proprio eventuale inadempimento causato da accadimenti al di fuori del suo ragionevole controllo quali, a titolo meramente indicativo, mancata o ritardata consegna dei materiali di lavorazione da parte dei fornitori, guasti agli impianti, scioperi e altre azioni sindacali, interruzione dei flussi energetici, sospensione o difficoltà nei trasporti.

Ogni evento di forza maggiore sospende la decorrenza del termine per tutta la sua durata. Se, in conseguenza di eventi di forza maggiore, il contratto non potrà trovare esecuzione entro i 60 giorni successivi al termine convenuto, ognuna delle due parti avrà la facoltà di recedere dal contratto stesso. In tal caso la dichiarazione di recesso dovrà essere spedita alla controparte, a mezzo lettera raccomandata con ricevuta di ritorno o p.e.c. entro i 10 giorni successivi allo scadere dei predetti 60 giorni, restando esclusi i reciproci diritti a indennizzi od a risarcimenti.

6. PREZZI E TERMINI DI PAGAMENTI

I prezzi dei prodotti indicati nei cataloghi vigenti sono EXW (Franco Fabbrica); ne consegue che qualsiasi altro onere relativo alla spedizione, consegna e/o trasporto è a esclusivo carico dell'Acquirente. I prezzi si intendono al netto di IVA di legge, che deve essere corrisposta in conformità a quanto indicato in fattura. Il luogo di pagamento è fissato presso la nostra Sede Amministrativa in Solignano di Castelvetro (MO), anche nel caso di emissioni di tratte, ricevute bancarie, LCR, ovvero di rilascio di effetti cambiari: eventuale deroga a quanto sopra sarà valida soltanto se da noi concessa in forma scritta.

Il ritardo del pagamento, anche parziale, delle nostre fatture oltre la pattuita scadenza, darà luogo come previsto per legge all'automatica decorrenza degli interessi di mora, calcolati in conformità a quanto previsto dal D.Lgs. n. 192 del 9 novembre 2012, inoltre il mancato o ritardato pagamento anche parziale delle fatture - per qualsivoglia ragione - darà diritto al Venditore, impregiudicata ogni altra iniziativa, di pretendere il pagamento anticipato delle restanti forniture o, in alternativa, il diritto di sospendere le forniture o di risolvere i contratti in corso, anche se non relativi ai pagamenti in questione, nonché il diritto al risarcimento degli eventuali danni.

Non è ammessa la compensazione da parte dell'Acquirente con eventuali crediti, comunque insorti, nei confronti del Venditore.

Per la fatturazione valgono i prezzi di listino in vigore al giorno della consegna. In caso di un cambiamento dei prezzi tra la conferma d'ordine ed il giorno della fornitura, il Venditore ha il diritto di adeguare i prezzi pattuiti alla nuova situazione. Tuttavia qualora detto prezzo superi del 20% quello convenuto al momento dell'ordine, l'Acquirente potrà recedere dal contratto mediante invio di comunicazione scritta con raccomandata a.r. o a mezzo p.e.c. entro il termine perentorio di 10 gg dal ricevimento dell'avviso dell'aumento di prezzo. In difetto, il nuovo prezzo s'intenderà accettato.

7. SOLVE ET REPETE

Nessuna contestazione o controversia inerente alla qualità della merce, a vizi o difetti, o a qualsiasi altro aspetto del contratto, sarà efficace e potrà essere presa in considerazione, e così pure nessuna azione potrà essere iniziata se non dopo l'avvenuto integrale pagamento del prezzo.

8. RISERVA DI PROPRIETÀ

Nel caso in cui il pagamento, per accordi contrattuali, debba essere effettuato - in tutto o in parte - dopo la consegna, i prodotti consegnati restano di proprietà del Venditore fino all'integrale pagamento del prezzo.

La merce oggetto di riserva di proprietà dovrà essere, a cura dell'Acquirente, tenuta fisicamente da parte e individuata come proprietà del Venditore.

L'Acquirente non potrà vendere fuori dai suoi normali rapporti commerciali, né consegnare a terzi, dare in pegno e comunque disporre dei prodotti oggetto di riserva di proprietà del Venditore; dovrà inoltre informare tempestivamente il Venditore di ogni diritto che i terzi possano aver acquisito sulla merce stessa.

In caso di mora dell'Acquirente il Venditore potrà, senza necessità di alcuna formalità, compresa la messa in mora, ritirare tutta la merce oggetto di riserva di proprietà, con riserva di ogni ulteriore opportuno rimedio in via giudiziale per il pregiudizio subito.

9. GARANZIA E RECLAMI

I prodotti realizzati dal Venditore sono conformi alle Norme UNI-DIN-EN attualmente in vigore.

La nostra garanzia è limitata ai materiali di prima scelta. Qualsiasi garanzia per vizi è quindi espressamente esclusa per i materiali di seconda e di terza scelta o di stock e per le partite occasionali. Tali materiali sono venduti come "visti e graditi".

I materiali in 1° scelta vengono garantiti conformi alle Norme ISO vigenti al momento della vendita con una tolleranza del 5% (cinque per cento); la tonalità del materiale fornito può differire dal campione esposto, essendo la ceramica intrinsecamente variabile come aspetto. Per quanto qui non espressamente stabilito, i prodotti vengono venduti con riferimento alle regole dell'arte ed alle consuetudini comunemente in uso nel settore ceramico ed ai consigli di utilizzo riportati nel nostro catalogo generale.

È fatto obbligo all'Acquirente di verificare la merce in termini di qualità e quantità. Eventuali reclami e contestazioni dovranno essere denunciati, entro e non oltre 8 (otto) giorni dal ricevimento della merce, a pena di decadenza, a mezzo lettera raccomandata a.r. o mediante p.e.c., presso la nostra sede legale in Solignano di Castelvetro (MO).

Il materiale considerato difettoso dovrà essere tenuto a disposizione di Ascot per le verifiche che riterrà opportuno effettuare; ogni ulteriore azione (restituzione, riparazione o altro) dovrà essere da noi preventivamente autorizzata per iscritto. Il materiale contestato e/o da rendere deve essere immagazzinato dal Compratore in modo adeguato, al riparo da agenti atmosferici, così da evitare eventuali danneggiamenti.

Reclami e richieste di intervento in garanzia dopo la posa in opera non saranno presi in esame nel caso in cui il difetto contestato dovesse risultare palese (es. sbeccate, difetti dimensionali, differenze di tono, ecc.).

I reclami imputati a difetti o vizi occulti dovranno essere formalizzati per iscritto mediante lettera raccomandata a.r. o p.e.c. presso la nostra sede legale in Solignano di Castelvetro (MO) entro 8 (otto) giorni dalla scoperta e, in ogni caso, entro un anno dalla consegna, pena la decadenza da ogni diritto alla garanzia e di risarcimento. La comunicazione dovrà contenere, oltre i dati di fatturazione, una precisa descrizione del vizio, un preventivo dei costi di riparazione o modificazione del prodotto; in mancanza di questi dati il reclamo si considera nullo.

La garanzia per difetti occulti rimane esclusa o limitata nel caso di: rimozione non autorizzata dell'opera, posa non effettuata a regola d'arte, inosservanza di nostre prescrizioni e particolari direttive di applicazione atti del danneggiamento non ispirati alla normale diligenza che abbiano pregiudicato il contenimento dei danni.

L'utilizzo di merce visibilmente difettosa o difforme all'ordinato implica accettazione delle caratteristiche di qualità ed esclude ogni eventuale contestazione.

Qualora il reclamo dovesse risultare infondato l'Acquirente dovrà risarcire Ascot di tutte le spese sostenute per l'accertamento (viaggi, perizie, ecc.).

L'obbligo di Ascot è, in ogni caso, limitato alla sostituzione dei soli pezzi difettosi o alla riparazione, con espressa esclusione di ulteriori diversi indennizzi quali, a titolo indicativo ma non limitativo, per costi di rimozione e sistemazione di mobili, attrezzature, macchinari ecc., mancati guadagni per interruzione o sospensione di attività, disagi, danni indiretti ecc. La presenza di piastrelle difettose non inficia la qualità dell'intera fornitura né comporta l'obbligo della integrale sostituzione.

I limiti temporali della durata della garanzia sono quelli stabiliti dal codice civile italiano.

10. CESSIONE DEL CONTRATTO

L'Acquirente non può cedere la sua posizione nel contratto od in singoli rapporti obbligatori da questo derivanti senza l'accettazione scritta di Ascot: anche in tal caso l'Acquirente rimane comunque solidalmente responsabile col cessionario per le obbligazioni cedute.

11. LEGGE APPLICABILE E FORO COMPETENTE

Le presenti Condizioni di Vendita e ciascun contratto stipulato tra Venditore ed Acquirente, ivi compresi i contratti di vendita all'esportazione, sono regolati dalla legge Italiana, compresi gli Usi di settore della Provincia di Modena.

Per qualsiasi controversia comunque derivante dal contratto di fornitura, tanto da parte di Ascot come da parte dell'Acquirente, è esclusivamente competente il Tribunale di Modena. E' comunque in facoltà del Venditore adire autorità giudiziarie diverse.

12. PROPRIETÀ INDUSTRIALE E DISTRIBUZIONE SELETTIVA — LIMITI ALLA RIVENDITA

Ascot è titolare e legittimo detentore di esclusive relative ai marchi, a disegni e brevetti di invenzione.

Ascot gestisce le forniture dei propri prodotti mediante un sistema di distribuzione selettiva.

Le forniture ricevute da Ascot e dai propri punti vendita selettivi autorizzati sono destinate all'installazione presso l'utente finale e non è consentita altra forma di rivendita a ulteriori intermediari commerciali diversi dagli utenti finali, salvo preventiva autorizzazione scritta da parte di Ascot.

La rivendita della merce in violazione di tale divieto deve considerarsi non consentita e Ascot si riserva il diritto di procedere giudizialmente nei confronti di chiunque sia coinvolto in rivendite non autorizzate.

CONDIZIONI GENERALI DI VENDITA

1. CONTRACTUAL PROVISIONS

These terms and conditions govern all contracts of sale between Ascot Gruppo Ceramiche S.r.l. and the Buyer, subject to any variations or amendments agreed in writing.

Any changes to these terms and conditions or to our offers, credits or discounts granted by our agents or by other intermediaries are only valid if accepted in writing by our head office.

If one or more parts of these terms and conditions are invalid, the terms and conditions as a whole will remain valid; the invalid clauses will be replaced by clauses that reflect the parties' original intention as closely as possible.

Any offer, acceptance of order or delivery by the Vendor will be made under these terms and conditions, unless agreed otherwise in a written derogation signed by the Vendor; the acceptance of such offers and the receipt of products from the Vendor thus implies the Buyer's acceptance of these terms and conditions and of any supplementary conditions agreed in writing between the parties.

It is agreed that the sale contract is fulfilled at the Vendor's place of business.

2. SCOPE OF SUPPLY AND CONFIRMATION OF ORDER

The illustrations and descriptions in the catalogues and price lists, and as well as all our publications and samples, are not binding and are purely indicative. The dimensions of products requiring calibration, specifically hard enamel porcelain and porcelain stoneware flooring, must be understood with the usual tolerance values.

The colours of the materials are always approximate. Differences in shading do not constitute defects in the materials, and may not be reported as such.

The measurements, weights and characteristics indicated on our price list must be considered to be indicative.

The supply only includes the services, materials and quantities specified in the order confirmation or in any other written communication from the Vendor. The text of the Vendor's order confirmation will prevail in all cases, if the text in the offer or order is different.

If an order has not been confirmed in writing, under no circumstances may it be considered to be accepted, save for fulfilment by the Vendor through a written goods-ready notice, or notice of shipment, or through delivery of the product.

Partial fulfilment of the order without prior confirmation does not signify approval of the entire order, but only partial approval, in relation to the goods that were delivered. In such a case, delivery of the goods to the carrier equates to the Buyer's acceptance of the new contractual offer.

Goods that were ordered in error or in surplus quantities by the Buyer and any unsold goods will not be collected by the Vendor.

3. DELIVERIES

The delivery takes place at the Vendor's site in Solignano di Castelvetro (Modena). The goods always travel at the Buyer's risk and peril.

Our liability ends upon delivery to the carrier.

The Buyer is also liable for the risk of any breakage, tampering and/or damage.

Shipment of goods abroad, either by sea or by land, will take place in accordance with the conditions chosen in each case, as stated in the Incoterms approved by the International Chamber of Commerce.

4. TERMS OF DELIVERY

The date agreed for delivery of the goods must be considered in favour of both parties to the contract.

The date of delivery is purely indicative and is not binding. Any delays in deliveries, or any interruption or total or partial suspension of the supplies, will not give the Buyer the right to cancel any order or to claim compensation for any direct or indirect damages.

The Vendor may fulfil partial deliveries, for each order.

If changes are made to the contract, the delivery date will be extended by a period equal to that which was initially agreed.

If the deliveries are more than 30 days late, the Buyer may, after sending an ordinary notice to default, refuse further deliveries and withdraw from the contract, as to the products which have not yet been delivered. Withdrawal from the contract in respect of any goods that were not delivered due to delay will only give the right to payment for the products that were effectively delivered. Any other compensation or indemnity is excluded.

5. FORCE MAJEURE

The Vendor is not liable towards the Buyer for any non-performance caused by events beyond its reasonable control, including but not limited to: the non-delivery or late delivery of materials from suppliers, faults in plant or machinery, industrial action or strikes, power outages, suspension transport or transport-related problems.

Any event of force majeure will suspend the effect of the delivery period, for its duration.

If, as a result of a force majeure event, the contract cannot be fulfilled within 60 days of the agreed date, either party may terminate the contract. In such a case the declaration of termination must be sent to the adverse party by registered post or by certified email within the 10 days following the expiry of the 60-day period, excluding both parties' right to indemnity or compensation.

6. PRICES AND TERMS OF PAYMENT

The prices of the products indicated in the current catalogue are EXW (Ex-Works); consequently any other costs relating to shipment, delivery and/or transport are borne exclusively by the Buyer. The prices are net of statutory VAT, which must be paid in accordance with the amount indicated on the invoice. The place of payment is our administration office in Solignano di Castelvetro (Modena), also in the case of bankers' drafts, bank collection orders, letters of credit or bills of exchange; any derogation to this condition will only be valid if authorised by us in writing.

Any delay in the payment of even part of our invoices, beyond the agreed date, will, as provided for by law, result in the automatic charging of default interest to be calculated in accordance with Italian Legislative Decree no. 192 of 9 November 2012. The late payment or non-payment of any part of the invoices for any reason will also entitle the Vendor, without prejudice to any other action, to claim advance payment for the remaining supplies, or alternatively the right to suspend the supplies or terminate pending contracts even if they do not relate to the payments in question, as well as the right to demand compensation for any losses.

The Buyer may not offset the outstanding amounts due against any claims against the Vendor.

The list prices in force on the date of delivery will apply, for invoicing purposes.

Where there is a change in the prices between the date of the order confirmation and the date of the supply, the Vendor may adjust the prices to the new situation.

However, if the price exceeds the price agreed at the time of the order by 20%, the Buyer may terminate the contract by sending written notification by registered post or certified email, within 10 days from receiving notification of the price increase. Otherwise, the new price will be considered to be accepted.

7. SOLVE ET REPETE

No dispute or objection relating to the quality of the goods, or to flaws or defects or any other aspect of the contract will be effective, nor will it be considered, nor may any legal action be started, until the price has been paid in full.

8. RESERVATION OF TITLE

If the contract provides that payment is to be made in full or in part after delivery, the delivered products will remain the property of the Vendor until the price has been paid in full.

Goods covered by a reservation of title must be kept physically separate by the Buyer and marked as property of the Vendor.

The Buyer may not sell any goods covered by a Vendor's reservation of title, outside of the ordinary course of its business nor may it deliver such goods to third parties, pledge them or otherwise dispose of them; the Buyer must also duly inform the Vendor of any rights that the third parties may have acquired to such goods.

In the case of default by the Buyer the Vendor may, without the requirement to give any formal notice, including notice of default, collect all the goods covered by the reservation of title, and may take any further appropriate legal remedies in respect of its losses.

9. WARRANTY AND COMPLAINTS

The products made by the Vendor conform to the current UNI-DIN-EN standards.

Our warranty is limited to first-rate materials. Any warranty for defects is thus excluded for second- or third-rate materials, and for occasional batches. Such materials are sold "seen and approved".

The first-rate materials are guaranteed to conform to the ISO standards in force at the time of sale, with a tolerance of 5% (five per cent); the shading of the material may differ from the samples on display, as ceramics are naturally prone to variation in their appearance. For all matters not expressly provided for herein, the products are sold according to the usual practices and customs applied in the ceramics industry, and in accordance with the user recommendations stated in our general catalogue.

The Buyer is responsible for checking the quality and quantity of the goods. Any complaints or objections must be reported within 8 (eight) days from receipt of the goods, failing which they will be invalid. Complaints must be sent by registered post or certified email to our head office at Solignano di Castelvetro (Modena). Any materials considered to be defective must be made available to Ascot for checking. Any further actions (returns, repairs, etc.) must be authorised by us in writing, in advance. The disputed materials and/or returns must be adequately stored by the Buyer, away from atmospheric agents, to avoid any damage. Complaints or requests for works under warranty after installation will not be considered if the defect is obvious (e.g. chips, dimensional flaws, differences in shade, etc.).

Complaints made in respect of defects or hidden flaws must be formally submitted in writing by registered post or certified email to our head office at Solignano di Castelvetro (Modena), within 8 (eight) days from discovery. In any case, complaints must be made within one year from delivery, under penalty of forfeiture of all rights to warranty or compensation. The communication must contain not only the invoicing details but also a specific description of the defect, an estimate of the cost of repairing or modifying the product; without such information, the complaint will be considered invalid.

Any guarantee for hidden flaws is excluded or limited in the following cases: unauthorised removal of the product, installation not carried out to professional standards, failure to observe our recommendations for specific instructions, or damage which would not have been caused had due diligence been observed, and which meant that the damage could not be limited.

The use of visibly defective goods, or goods which differ from the order, implies acceptance of the quality specifications. Any complaints are excluded.

If a complaint is found to be groundless, the Buyer shall be liable to pay Ascot all the expenses incurred by Ascot in investigating the complaint (travel, expert's reports, etc.).

Ascot's obligations are limited in all cases to replacement of the defective items, or to repair, with the express exclusion of any further indemnity including but not limited to: the cost of removing and reinstalling furniture, fittings or machines, loss of earnings due to interruption or suspension of business, inconvenience, indirect losses.

The presence of defective tiles does not affect the quality of the consignment as a whole, nor does it entail an obligation for full substitution.

The time limit of the warranty is determined by the Italian Civil Code.

10. ASSIGNMENT OF CONTRACT

The Buyer may not assign the contract nor any obligations deriving from the contract without written acceptance from Ascot. Also in this case, the Buyer remains jointly and severally liable with the assignee, for the assigned obligations.

11. APPLICABLE LAW AND JURISDICTION

These Terms and Conditions, and any contracts made between the Buyer and the Vendor, including contracts for export sales, are governed by Italian law and the industry practices applied in the Province of Modena.

The Court of Modena shall have sole jurisdiction in respect of any dispute arising on the part of Ascot or of the Buyer, in relation to the supply contract. The Vendor may take action before any other legal authority.

12. INDUSTRIAL PROPERTY AND SELECTIVE DISTRIBUTION – LIMITS ON RESALE

Ascot is the owner and legitimate holder of exclusive rights relating to the trademarks, designs and invention patents.

Ascot uses a selective distribution system to supply its products.

Consignments received from Ascot and its authorised, selected retailers are intended for installation with the end user. No other form of resale to other intermediaries, apart from the end user, is permitted without the prior written authorisation of Ascot.

Any resale of the goods that violates the above condition is prohibited. Ascot may take legal action against anyone who is involved in unauthorised reselling.
